Part No.:

Addendum:

Question:

Please provide the calculations and reference documents used to develop the average annual LMP for each of the forecast years. Please also provide the LMPs applicable to ENO for each hour of the most recent three calendar years.

Response:

See the attached hourly Day Ahead and Real Time LMPs applicable to ENO for each hour of the most recent three calendar years.

Information responsive to this request has been designated as Highly Sensitive Protected Material (“HSPM”) under the terms of the provisions of the Official Protective Order adopted pursuant to Council Resolution R-07-432 relative to the disclosure of Protected Material and is being provided in accordance with the same.

LMPs are calculated by the proprietary AURORA model and can be output in different forms. See the highly sensitive attachments for the BP18-U forecasted hourly LMPs, which correspond to the BP18-U forecasted annual average LMP values, and the assumptions used in the AURORA model to produce the LMPs.
