

ENTERGY NEW ORLEANS, INC.
CITY OF NEW ORLEANS
Docket No. UD-16-01

Response of: Entergy New Orleans, Inc.
to the Second Set of Data Requests
of Requesting Party: Alliance for Affordable
Energy

Question No.: AAE 2-9

Part No.:

Addendum:

Question:

Please provide a map of all substation locations, their names, and base flood elevation within the ENO service territory. For each substation, please indicate if it has flooded in the past 12 years, the date it was flooded, the duration of the flood, and by how many feet. For each substation, please indicate other events that impacted the substation over the past 12 years.

Response:

ENO objects to this request to the extent that it seeks the disclosure of CEII as defined by the FERC. Subject to this objection, ENO states that it will attempt to provide any information responsive to the request that is not designated as CEII. ENO further objects to the request in that it is overly broad and vague due to the use of the undefined term "other events." Subject to this objection, ENO states that it will produce responsive information related to floods affecting substations within ENO's service territory.

See the attached.
