

ENTERGY NEW ORLEANS, INC.
CITY OF NEW ORLEANS
Docket No. UD-16-02

Response of: Entergy New Orleans, Inc.
to the First Set of Data Requests
of Requesting Party: Alliance for Affordable
Energy

Question No.: AAE 1-3

Part No.:

Addendum:

Question:

Please provide all documents relied upon by Gary Huntley to support his statement made on June 30, 2016 meeting of the UCTTC: “That is correct from Entergy’s perspective” when responding to Councilmember Head’s statement that “nothing has been decided on the exact size of any plant that would be built in the New Orleans region.” See video of June 30th meeting of the UCTTC available online at: http://www.nolacitycouncil.com/video/video_legislative.asp.

Response:

AAE 1-3 does not provide context for Mr. Huntley’s statement. At the June 30, 2016 meeting of the UCTTC, councilmembers were engaged in a discussion regarding the opportunity for community involvement in the process to approve the proposed New Orleans Power Station. Several Councilmembers, including Councilmember Head, made the point that the Council was not deciding the merits of the Company’s Application at that time; and that there will be a formal process that allows stakeholder engagement before any decisions are made by the Council. Mr. Huntley agreed with that concept and has stated many times that the procedural schedule for ENO’s Application is only beginning and that a final Council decision on the merits will only take place after a procedural process that is separate and apart from the IRP procedural process. As the Alliance is well aware, the Company has a position regarding the CT technology that is most economic and beneficial for ratepayers, which will be litigated in UD-16-02. Please see Application for Approval to Construct New Orleans Power Station, filed June 20, 2016, which contains the Company’s request with respect to the size of the proposed New Orleans Power Station.
